Fisheries Certificate Schedule

Bering Sea and Aleutian Islands Atka Mackerel, Pacific Ocean Perch, and Northern Rockfish and Gulf of Alaska Pacific Ocean Perch, Northern Rockfish, and Dusky Rockfish

Client/Certificate Holders:
Alaska Seafood Cooperative

Management System: The groundfish fisheries, including Atka mackerel, Pacific Ocean perch, northern rockfish and dusky rockfish, in the BSAI and GOA are managed by two different, but complimentary, FMPs: BSAI FMP and GOA FMP. Program policies and measures are developed by the Council through the preparation and maintenance of FMPs for groundfish, crabs, and scallop fisheries in the BS and GOA, as well as for all future fisheries in the Arctic Ocean. The FMPs are frequently amended by the Council to respond to new scientific information, changes in the environment, changes in policy, and operational changes in the fisheries. The plan amendments, together with regulatory amendments, are developed through the Council's open and transparent regulatory process and implemented by the NMFS Alaska Regional Office.

Chain of Custody: Product is either processed at sea and transferred to cargo vessels in U.S. waters; or landed at onshore processing facilities. The activity of processing at sea would be included within the scope of the fishery certificate. The fishery certificate would end at offload from the fishing vessel to a cargo vessel, accompanied by a government required landing report (fish ticket, eLanding, or equivalent). Further processing would fall under the CoC of the receiving company.
